## COURSE OF STUDY.

---

The Divisions I, II, III, etc., in the foregoing table, are made with reference rather to the studies in charge of different teachers than to the strictly logical groupings of subjects. The annexed SYLLABUS is intended as a key to the table.

---

### DIVISION I.

**OBSERVATION IN THE MODEL SCHOOL.** *First Term.* This includes a careful study of the operations of the Primary School, together with actual instruction by the Training-Teacher, in the management of classes, and in the principles and methods of teaching young children. The observers are required to take notes of what is done and said, and to write them out carefully in their diaries, which diaries are inspected and marked by the teacher. Both the subject matter and the composition of the diaries are criticised. Every pupil entering the Normal School is strictly required to take this work.

**THEORY AND PRACTICE OF TEACHING.** *Third Term.* This work consists of a series of familiar lectures by the President; these lectures are accompanied by frequent references to standard works on teaching. The pupils take notes of the lectures, and embody their substance in essays, which are carefully examined and criticised. The following are some of the most prominent topics of discussion: 1—**EDUCATION:** What is it? Its relation to Learning; its mode, in respect to the body, the mind, and the conscience. 2—**THE MIND:** Its essential unity: classification of its powers; order of their development; cultivation of the senses, the memory, and the reason. 3—**THE TEACHER:** His motives; his preparation; his manners; his habits of dress, action, thought, and speech; his health. 4—**THE SCHOOL:** The house and its surroundings, furniture, and apparatus; organization of a school; first day's work; classifying; the programme; grading, etc. 5—**SCHOOL MANAGEMENT:** Principles of Government; punishments; making rules; the characteristics of a teacher which are essential to good management. 6—**INSTRUCTION:** What is a recitation? Assigning lessons; hearing lessons; use of text-books; exactness and promptness in recitation; helping pupils; methods of questioning, etc.

**PSYCHOLOGY.** *Fourth Term.* Mental Science, as compared with other sciences. Definition and Classification of the Mental Powers. Consciousness. Attention. Conception. Sense-perception. Theories

concerning Sense-perception. Opinions of different philosophers on this subject. Qualities of Bodies as related to Sense-perception. Functions and Culture of the Different Senses. Memory; its nature, use, and methods of culture. Laws of Memory. Effects of disease on Memory. Imagination. Its relation to the other faculties. Uses and Abuses of the Imagination. The Reflective Power. Abstraction. Judgment. Analysis. Synthesis. Classification. Reasoning by induction; by deduction. Reasoning from testimony; from experience; from analogy. Mathematical Reasoning. The Syllogism; its uses; its laws. Opinions of different authors respecting Logic.

All these topics are studied with special reference to their bearing on the work of teaching. Dr. Haven's text-book is made the basis of the study.

**HISTORY OF EDUCATION.** *Seventh Term.* A History of the Culture of different nations, from the earliest times down to the present; also, the Biography of Eminent Educators in all countries and times.

**PHILOSOPHY OF EDUCATION.** *Seventh Term.* This includes a study of *Rosenkranz's Pedagogics as a System*. The study is made as complete as the brief time will allow.

**CONSTITUTION OF THE UNITED STATES.** *Eighth Term.* Dr. Israel W. Andrews's text-book is used. Particular attention is given to the text of the Constitution; and the exposition and history, as presented by the author, receive all the attention that time will permit. The State Constitution is studied in connection with that of the Nation.

**TEACHING IN THE MODEL SCHOOL.** Each pupil, after the first year, is required to teach in the Model School, subject to the supervision and criticism of the Training-Teachers. He takes the entire charge of a class in a single study, and is responsible for both the instruction and the discipline. Four terms of such work is the amount usually required.

## DIVISION II.

**GRAMMAR.** *Second Term.* Etymology. Offices and Peculiarities of the Parts of Speech. Critical Parsing of examples given in the text-book or dictated to the class, and of selections from standard writers. Correction of False Syntax. Written Exercises throughout the term, marked with reference to Capitalization, Punctuation, Spelling and Construction, as well as Subject-matter.

*Third Term.* Syntax. Classification of Sentences, and of the Elements of the Sentence. Construction of Sentences. Analysis of Sentences, orally, in writing, and by the use of diagrams. Naming of the Parts of Speech, and construction of each word in the sentence given. Consideration of Abridged Propositions, and of Idiomatic Forms and Constructions. Correction of False Syntax. Written exercises marked as above. Text-books: GREENE'S.

**READING.** *First and Second Terms.* Analysis of words according

to their Elementary Sounds. Articulation and Pronunciation. Compass and Flexibility of Voice. Stress and Emphasis. Pauses. Inflections. Analysis of Words according to their Derivation and Formation. Analysis of the Thought. Practice in Elocution. Text-books: EDWARDS'S.

**RHETORIC.** *Fifth Term.* Diction, including Purity, Propriety, Precision, Clearness, Unity, Strength, and Harmony. Rhetorical Figures. Style and its varieties. Original Composition during the term. Text-Book: A. S. HILL'S.

**LITERARY CRITICISM.** *Sixth Term.* Critical examination of the style of some of the best authors in the English language, with reference to the Thought, Diction, Sublimity, Beauty, and Rhetorical Figures. Original Composition during the term. Same Text-book.

**HISTORY AND METHODS OF EDUCATION.** *Seventh Term.* The chief educational ideas of the leading nations, ancient and modern. Text-book: HAILMAN'S.

**ENGLISH LITERATURE.** *Eighth Term.* Sketches of the leading authors in each department, from the time of Chaucer, with critical study of selections from the same. Text-books: SHAW'S.

**HAMLET AND THEMES.** *Ninth Term.* A critical study of Shakespeare's Play of Hamlet. Orations and Essays. HUDSON'S EDITION.

#### DIVISION III.

**ARITHMETIC.** *First Term.* General Definitions. Notation, three methods; Numeration, two methods; Addition, schemes for class work; Subtraction, two methods of explanation; Multiplication, including short methods; Division, including short methods. Prime Factors of numbers to 100; tests of divisibility; Cancellation; G. C. D.; L. C. M.; Fractions; Decimal Fractions; Compound Numbers.

*Second Term.* Straight-line Analysis; Ratio; Simple and Compound Proportion; Percentage, and its applications to Gain and Loss, Commission, Insurance, Taxes, Duties, Interest, Discount, Partnership, Equation of Payments and Average of Accounts and Exchange. Extraction of Second and Third Roots. Text-book: RAY'S HIGHER.

**ALGEBRA.** *Third Term.* Topics in Ficklin's Complete Algebra, to chapter viii.

*Fourth Term.* Chapters viii. to xiii., inclusive, and chapters xvii. and xviii. Ficklin's Complete Algebra.

**GEOMETRY.** *Fifth Term.* Books I to V, inclusive, Loomis's Geometry.

*Sixth Term.* Books VI to X, inclusive, Loomis's Geometry.

*Sixth Term.* (Optional.) Plane Trigonometry, with its application to Land Surveying; Leveling, Variation of Magnetic needle.

**PHYSICS.** *Seventh Term.* Avery's Natural Philosophy. Laboratory Work throughout the term.

**ASTRONOMY.** *Eighth Term.* Ray's Elements of Astronomy to

to chapter xv. Study of Constellations visible from Dec. 1st to March 1st. Text-book: BURRITT'S GEOGRAPHY OF THE HEAVENS.

**DRAWING.** *Fourth Term.* Inventive and Industrial Drawing, with daily exercises in judging of the length and position of lines. Exercises in dictation given by the pupils. Outline Drawing from Models. Shading begun.

*Ninth Term.* Perspective. Linear. Principles for, and location of points in, Parallel and Angular Perspective. Projection of shadows. Reflection. Problems given throughout the term, involving all principles in Perspective. Text-book: WALTER SMITH'S.

#### DIVISION IV.

**GEOGRAPHY.** *First Term.* General Principles of Geography. Brief study of the countries of Continental Europe, Asia, and Africa. Outlines and Maps of the principal countries of Europe and Asia, showing their principal Mountains, Rivers, and Cities. More thorough study of Britain as a model. Brief study of the countries of South America; Outline and Map of the Continent. Astronomical Geography; Latitude and Longitude; Day and Night; the Seasons, etc.

*Second Term.* Outline and Map of North America. Study of the Continent, as a whole. Brief study of British America, Mexico, Central America, and the West Indies. Thorough study of each of the States and Territories. Execution of a Map of each of the States, and of the principal Cities. Text-book: OPTIONAL.

**PHYSICAL GEOGRAPHY.** *Sixth Term.* Review of the Earth's Form, with a sketch of the Theory of its Origin. Physical life of the Earth; Temperature; Atmospheric and Marine Currents; Rains, and the Effects of Climatic Conditions on Vegetable and Animal Life. Historical View of the Earth; the Relations of its Forms and Physical Life to the Development of the Human Race. Text-book: GUYOT'S EARTH AND MAN.

**UNITED STATES HISTORY.** *Third Term.* Voyages, Discoveries and Indian Tribes. Colonial History, French War, and Revolution. Brief History of the successive Administrations, from Washington's up to the War of Secession in 1861. Founding and Progress of the States in the West and Southwest. History of the War of Secession. Text-book: SWINTON.

**ANCIENT HISTORY.** *Fourth Term.* Early Asiatic Nations. Grecian History. Roman History. Text-book: SWINTON'S OUTLINES.

**ENGLISH HISTORY.** (Optional.) *Fifth Term.* Text-book: THALHEIMER'S.

#### DIVISION V.

**CHEMISTRY.** *Seventh Term.* Twenty elements. Symbols; Atomic Weight; Properties, chemical and physical; Laws of Combination; Formulæ; Chemical Equations; Reactions; Compounds. Gases—Liber-

ation; Collection; Management; Combination; Properties. Salts—Properties; Composition; Decomposition; Detection; Knowledge of 50 Compounds. Metals—Properties; Appearance; Detection; Commercial Importance. Organic Chemistry—Food of Plants; Formation of Organic Matter. Qualitative Chemistry is associated with General Chemistry in all the work. All students are furnished with complete apparatus for fullest experimentation. Each student becomes acquainted with the construction and management of four different kinds of batteries. Power is acquired to manage the compound blow-pipe, calcium light and electrical apparatus. *Students do the work.* Text-book: STORER & ELLIOTT'S.

BOTANY. *Sixth Term.* Seeds—parts; kinds; germination. Plants—food; growth; fruitage; uses. Principles of Classification, and rules for Spelling, Pronouncing, and Capitalizing the names of the *orders genera* and *species*. Familiarity is acquired with twenty-five orders from the analysis of plants, and from the study of the trees and shrubs on the University grounds. Students have access to twenty botany-presses, and to one good dissecting microscope, for plant-analysis and the study of plant structure. Much experimental work is done in this study. Text-book: GRAY'S FIELD BOOK.

ANATOMY AND PHYSIOLOGY. *Fifth Term.* General View of the Structure and Functions of the Human Body. Food and the Digestive Process. The Blood; its Chemical Composition and Vital Properties. Respiration and Nutrition. The Nervous System. The Laws of Hygiene. Text-book: HUTCHISON'S.

ZOOLOGY. *Ninth Term.* Comparison and Description of individual Animals. Methods and principles of classification. Collection and preservation of specimens. Determination of *genera*. Comparative Anatomy, studied by dissections. Systematic observations upon the habits and development of animals. General laws of development and distribution. Text-book: PACKARD.

## TRAINING DEPARTMENT.

---

This department went into operation in September, 1874, under the charge of Prof. THOMAS METCALF, who retired from the chair of Mathematics to assume this new duty. He now devotes his entire time to the pupil-teachers. His work includes two somewhat distinct fields:

1. Observation of the young teachers while they are in charge of their classes, followed by personal criticism, favorable or adverse, or by needful illustration of what is thought better.

2. Regular lessons before the whole class of pupil-teachers. These are intended to correct erroneous notions in regard to "grading," the use of text-books, the purposes of a recitation, etc.; also, to insure efficiency in the assignment of lessons and in general discipline, and discretion in the use of motives to study, to acquire good personal habits, and the like. At these regular class-meetings, the diaries of the teachers are also read and criticised, while the practical themes suggested by these daily records are freely and profitably discussed.

At a recent meeting of the Board it was resolved, "That all persons who, by a satisfactory examination before the Faculty, shall show themselves entitled to a 'First-Grade Certificate,' may be received into a class for a year's course, TO BE DEVOTED EXCLUSIVELY TO TRAINING; also, that those so working in the Training School shall be entitled to a certificate of attendance."

More fully to carry into effect the purposes of the foregoing resolution, and furnish yet ampler means of complete training for the position of teacher, the Board voted a liberal salary for a Principal of the Model Primary School, the chief part of whose labor will be given to assisting the Training-Teacher in observing the work done by the apprentices, and especially in exemplifying the best methods of developing the younger minds.

By recent action of the Board, the Faculty will devote four weeks in August to the instruction of actual teachers. It is our purpose at this special term to give teachers an opportunity to pursue any topic embraced in our "Course of Study," provided only that they are prepared for it.

## SCIENTIFIC DEPARTMENT.

### STATE LABORATORY OF NATURAL HISTORY.

The recent re-organization of the Illinois Museum of Natural History in the University building, as a Biological Laboratory, and its elaborate furnishing and equipment for all kinds of botanical and zoological work, have greatly increased the resources of this department. The very unusual advantages now afforded here deserve the attention of all who wish either thorough general instruction in science, or opportunities for special study of the Natural History of Illinois. The collections of the Laboratory now comprise about 150,000 specimens, and are growing at the rate of 10,000 specimens a year. Nearly all this material is named, arranged, catalogued, and indexed, in the most convenient manner, and is entirely available for use.

### SPECIAL STUDENTS.

Students desiring to give much or all of their time to the pursuit of special objects in the Museum or Laboratory will be received by PROF. FORBES, at a charge of \$3 a term for incidental expenses. Such special students will be permitted to elect their course, but will be expected to adhere to it when once laid down.

Several courses of study in Zoology and Botany have been laid down, sufficient to occupy all the time of an average term. To students completing one of these courses in a satisfactory manner, a certificate to that effect will be issued.

All specimens, books, microscopes, and field and laboratory appliances needed for the prosecution of their work, except the common text-books and ordinary collecting and dissecting instruments and hand magnifiers, will be furnished for their use; and such amount and kind of individual instruction and assistance will be afforded as each seems to require.

No student wishing to make a detailed study of any branch of the Natural History of Illinois need hesitate to come here with that design. If anything be found lacking for his purpose, the authorities of the Institution stand ready promptly to supply it.

### LIBRARY.

The Library, although small, has been selected with reference to use in connection with the laboratory collections, and answers its purpose well. It is increased as rapidly as the necessities of the work require.

## CLASS-ROOMS.

The Dissecting Room will accommodate fifty or sixty students. It is furnished with dissecting tables, stools, trays, sinks, and washing conveniences, and is well fitted in every way for either general or special work.

The Chemical Laboratory will accommodate forty students, and is fully furnished with apparatus for practical work in Analytical Chemistry.

Further particulars concerning this department may be had upon application to the Director of the Laboratory, Prof. S. A. FORBES.

---

ADMISSIONS.

---

This Institution is intended for the training of young persons, of both sexes, for teachers in the schools of Illinois.

Students seeking admission to the University should make application to the School Superintendent of the county in which they reside. They are required—

(1.) To be, if males, not less than 17, and if females, not less than 16, years of age;

(2.) To produce a certificate of good moral character, signed by some responsible person;

(3.) To sign a declaration of their intention to devote themselves to school teaching in this state, as follows:

"I hereby solemnly declare, that my purpose in attending the Normal University is to fit myself for teaching in the schools of Illinois, and that I will carry out this pledge in good faith; and I do further pledge myself to report to the President of the University, semi-annually, where I am and what I am doing, for three years after graduating at said Institution."

(4.) To pass a satisfactory examination, before the proper officer (County School Superintendent), in Reading, Spelling, Writing, Arithmetic, Geography, and the Elements of English Grammar.

## EXTRACT FROM THE NORMAL UNIVERSITY ACT.

SEC. 7. Each County within the State shall be entitled to gratuitous instruction for one pupil in said Normal University, and each Representative District shall be entitled to gratuitous instruction for a number of pupils equal to the number of representatives in said district, to be chosen in the following manner: The School Superintendent in such county shall receive and register the names of all applicants for admission to said Normal University, and shall present the same to the County Court, or, in counties acting under township organizations, to the Board of Supervisors; which said County Court or Board of Supervisors, as the case may be, shall, together with the School Superintendent, examine the applicants so presented, in such manner as the Board of Education may direct, and from the number of such as shall be found to possess the requisite qualifications, such pupils shall be selected by lot; and in representative districts composed of more than one county, the School Superintendent and County Judge, or the Chairman of the Board of Supervisors in counties acting under township organizations, as the case may be, of the several counties composing such representative district, shall meet

at the Clerk's office of the County Court of the oldest county, and from the applicants so presented to the County Court or Board of Supervisors of the several counties represented, and found to possess the requisite qualifications, shall select, by lot, the number of pupils to which said district is entitled. The Board of Education shall have discretionary power, if any candidate does not sign and file with the Secretary of the Board a declaration that he or she will teach in the public schools within this State, in case that engagement can be secured by reasonable efforts, to require such candidate to provide for the payment of such fees for tuition as the Board may prescribe.

[AMENDED, February, 1861.]

SEC. 4. Each County in this State shall hereafter be entitled to gratuitous instruction for two pupils in said University, to be selected as provided in Section 7 of the Act to which this is an amendment.

If any County or Representative District neglects to make an appointment, the President of the University is, by a resolution adopted by the Board of Education, authorized to fill the vacancy by appointing some person of proper age and qualification. Every such person must pass, before the Faculty, an examination in the same subjects as in that required before the County Superintendent in other cases.

#### SUGGESTED FORM OF CERTIFICATE.

I hereby certify that I am well acquainted with.....  
and know him [or her] to be a person of good moral character.

In case the School Superintendent is not able to make the above certificate himself, something like the following endorsement should be appended by the School Superintendent.

I am well acquainted with.....who signs  
the above certificate, and believe him to be an entirely trustworthy man; and, so far as I know and believe, the above named applicant is a person of good moral character.

By vote of the Board, the President is authorized to admit suitable persons by examination, so long as the school is not filled with regular appointees.

Any teacher in the state is welcome to come here at any time, to remain as long as he pleases, to visit any of the classes and laboratories, and observe any of our work, all without enrollment or responsibility. If he is enrolled as a student, he is expected to follow our regular Course of Study, provided always that he will be excused from pursuing any study further, after attaining a standing of 85 per cent. on a rigid examination in the same. Occasionally an experienced teacher, by special arrangement, is allowed to pay tuition and to select studies to a certain extent, but such case is decided on its individual merits; we have no general rule to this effect.

## MODEL SCHOOL DEPARTMENT.

---

THE MODEL DEPARTMENT was established in order that there might be a school exhibiting the best methods of teaching, discipline, and classification, which the Normal students should visit, and in which they should take part as instructors. It is intended that the course of study in its several Grades shall embrace all that belongs to a thorough education from the elements up to a preparation either for college or for business.

This Department is divided into three Grades—the High, Grammar, and Primary Schools. Each of these is under the direct charge of an accomplished and efficient principal, who is assisted in part by permanent teachers, and in part by the pupil-teachers from the Normal School. The work of the latter is subjected to careful supervision and guidance.

The Classical Course is thorough, and is more extended than that of some colleges. Our young men enter Harvard and Yale without conditions.

The accompanying plans of study will give a general idea of the subjects to be pursued in the several Grades, and the time allotted to each. It will be observed that two distinct courses are arranged for the High School; one to prepare students for colleges, and the other for general business. The two, however, are made to blend whenever practicable.

The only requisites for admission are, a good character, and a tuition fee of thirty dollars per year in the High School, twenty-five in the Grammar School, and fifteen in the Intermediate Grade. Pupils, on being examined, are classed according to their attainments.

Boys and girls from abroad may be confidently intrusted to the care of the Principals; and besides the monthly report of Scholarship and Deportment at school, which is to be sent to all parents, there will be included, if desired, a careful statement of each pupil's general deportment, and of the manner of spending leisure hours.

## GRAMMAR-SCHOOL GRADE.

---

The Grammar grade is a school for those who wish to prepare for the Normal or High School, or for general business.

Young men and women, not fully prepared, who wish to enter the Normal Department, are enabled to do so by spending a term or two in the rigorous preparatory drill of the Grammar School; while, to those who are preparing for the High School, it offers the best academic training.

It is in direct charge of a Principal who does much of the teaching, and maintains the best of discipline. His assistant teachers are under the constant supervision of the Principal of the Training Department. Pupils often fail in their efforts to get a higher education, simply because their elementary instruction has been poor; hence, great care is taken that each one be well grounded in elementary knowledge.

Those who wish merely a common-school education will find the course comprehensive enough for all ordinary business purposes. Much care is taken that pupils shall become good penmen, and that they acquire such ready knowledge of arithmetic that they will make good accountants. Those more advanced will have the opportunity of studying book-keeping, taught according to the most practical methods.

The grading is such that pupils may take the work which they are best fitted to do; and, during the second year, such as can do so are allowed to take any of the languages in the High School.

The moral influence of the school and town is good. Vicious boys who are outcasts from other schools will not find admittance here; nor are saloons or other places of evil resort allowed in the town.

# PRIMARY GRADE.

## FIRST YEAR.

READING.—Webb's Dissected Cards, or Sentence-Builder; Edwards's First Reader.

1. Words presented as wholes.
2. Children led to form simple phrases and sentences, then to find the words and build the sentences.
3. Special attention given to distinctness of utterance, and naturalness of expression.
4. After the 1st Term, Elementary Sounds and Comparison of Words presented so as to enable pupils to help themselves to the pronunciation of new words as quickly as possible. Plan: New words, as they occur in their reading lessons, classified and arranged in columns on the board—1st, according to the vowel elements; 2d, according to the consonant elements. Daily drill upon some portion of this table.

SPELLING.—I. Class Exercises:

1. By the use of dissected words, ch'n led to see that: *a*—Each written or printed word is made up of parts; *b*—these parts must be in a certain order. Thus the idea that spelling is the analysis of the written word.
2. Spell the words of a phrase or sentence [that which has been previously presented as a reading-lesson] in their consecutive order—not depending upon the teacher for pronunciation—thus cultivating the power of attention, the habit of self-reliance, and the memory.

II.—Desk work, or Study. Each child provided with a box containing several alphabets [letters printed on bits of cards] from which he constructs the sentence to be spelled.

WRITING.—I. Lessons upon the different kinds of lines—straight and curved—direction of straight lines, right and left curve—preparatory to presenting the principles of Writing.

II.—1. Each letter presented in all its forms:

I i *l* *i*

Ch'n name these forms. Trace with pointer the 1st, 2d, and 4th forms; as they trace the "small *i* written," describe it according to its "principles," thus: "Right curve, straight slanting line, etc." So with the entire alphabet.

2. As soon as a number of letters has been presented sufficient to form a word, describe the word, thus learn to *join* the letters.
3. Daily practice in copying from the board on slates.

NUMBER.—I. Addition, Subtraction, Multiplication and Division of 2's as far as 12; 3's as far as 18. *a*—Original practical questions in application of each principle, a feature of every class-exercise throughout the year. *b*—Miscellaneous abstract combinations in the four processes, for rapid mental work. *c*—Instruction in regard to the signs given, as it becomes desirable to use them in forming tables. *d*—Develop the idea of fractions  $\frac{1}{2}$ ,  $\frac{1}{3}$ . Original practical questions illustrating their use.

II. Reading and writing numbers to 100; counting to 100 by 1's, by 2's [two series], by 3's [three series], and by 10's.

III. Learning the value of units and tens; ideas developed by means of objects; analyzing any number from 10 to 100, thus: "12 units are the same as 1 ten and 2 units; 1 ten and 2 units are the same as 12 units." The idea of "place" developed.

IV. Roman numerals to XXV, associated with the corresponding Arabic forms and written spelling of the name of each number.

LANGUAGE.—I. Recognition of all capitals and names of all punctuation marks occurring in reading-lessons; such simple rules for the same as: 1. At the beginning of sentences. 2. Names of persons, places, etc. 3. I and O when standing alone. 1. Period at the end of sentences. 2. Question mark at the end of a question.

II. First step in composition: The name of an object mentioned, ch'n think about this object, set the type [from their boxes of letters] so as to express their thought.

*Note.*—Special care taken throughout all the work to lead the ch'n to express their thoughts with clearness, accuracy, and elegance.

DRAWING.—Constructive exercise: Colored card-board cut in various shapes to represent the various forms of rectilinear figures.

a—1st Term's work limited to forming combinations with the representatives of straight lines ("sticks").

b—After 1st Term, ch'n transfer their original designs from the desk to the slate.

## SECOND YEAR.

READING.—I. Edwards's Second Reader. Exercises planned to accomplish these purposes: a—Instant recognition and accurate pronunciation of the consecutive words of a paragraph. b—Exercise for voice-culture—expressing the thoughts naturally and in pleasing tones. c—Tr. read sentence or paragraph, ch'n express the thought in their own language, and describe the mental pictures. d—Phonics. Continuation of the plan of the First Year's work, until pupils are familiar with the names and representatives of the elementary sounds, and can give them readily and accurately as they occur in any words of their reading lessons. e—To educate the ch'n to communicate the thought gathered from the written page, in a confident, pleasing, accurate manner.

II. Individual readings. Selections made from books at home. a—To encourage reading at home and from various books. b—To give pleasing variety to the work. c—To educate ch'n to gather thoughts from listening, and to criticise—thus training the ear. Supplementary Readers are used.

SPELLING.—I. Reading-lessons written upon slate, from memory when lessons are short, from dictation when lessons are long. Whether from memory or dictation, pupils held responsible in these written exercises for accurate reproduction of the text of the lesson, for punctuation, capitals, and all the points coming under the head of "Correct writing of English,"—margin, indentation, paragraphing, numbering, correct finishing of the right edge of the page (syllabication); neatness, accurate forming of each letter.

II. Second and Third Terms. Occasionally paragraphs dictated, which the pupils have had no opportunity for studying—to test their power to apply what they learn in the other work. Misspelled words of these paragraphs selected for special exercise.

III. Oral spelling to give drill upon special words; also practice in the study of syllabication—indicating the divisions of the word by suspension of voice between the parts.

WRITING.—I. Work continued according to the plan for First Year, until the alphabet is completed.

II. Primary Writing Book, used with lead-pencil. Instruction and drill upon correct positions.

NUMBER.—1. Addition, Subtraction, Multiplication and Division of 2's to 24; 3's to 36; 4's to 48; 5's to 60; 6's to 72. Abstract, miscellaneous combinations and original practical questions, as in First Year. 2. Notation to 1,000. 3. Written work in Add., Sub., Mul. and Div., involving only such numbers as correspond with their mental exercises. Fractions 1-4, 1-5, and 1-6. Plan the same as in the preceding year. Teach pupils to write dollars and cents. Roman numerals to 1,000. Plan the same as in First Year.

LANGUAGE.—1. Develop the idea that words are signs of thought. 2. Written exercises corresponding to Prin. II. under First Year's work. 3. Distinguish, recognize and construct simple sentences—telling, asking, commanding, exclaiming, change each into the other. 4. In the sentences which they construct, distinguish name-words and action-words. 5. Point II, under Spelling, used as a Language exercise.

DRAWING—Constructive exercises with papers cut to represent: *a*—Varieties of curvilinear forms; *b*—Combinations of rectilinear and curvilinear forms; *c*—Transfer to slate or drawing-books; *d*—Drawing from objects of simple outlines.

---

## THIRD YEAR.

---

READING.—I. Third Reader. General plan of Second Year's work continued.

II. How to find words in the Dictionary; application of knowledge previously gained by the study of Phonics. Instruction given in regard to accent, and how to select, from among the definitions of a word, one appropriate to the word as used in the sentence.

III. To substitute appropriate synonyms in rapid reproduction of Reading Lessons.

WRITING.—Plan of Second Year's work continued during first term. As far as practicable, the written exercise in Reading, Spelling, and Language—with pencil and paper. Third Term. instruction in the use of pen and ink.

NUMBER.—1. Review of Point 1 in Second Year's work. Addition, Subtraction, Multiplication, and Division of 7's to 84; 8's to 96; 9's to 108; 10's to 120; 11's to 132; 12's to 144. Introduce these families in written work (the four processes) as fast as pupils gain facility in mental work. 2. Develop the idea, and teach definition and representation, of 1-7, 1-8, etc., to 1-12. Original practical problems, containing these fractions; changing units to sevenths, to eighths, etc., and the reverse: changing units, halves, and fourths to eighths; thirds to sixths; tenths to fifths, halves, and units, etc. 3. Simple work in Addition and Subtraction of denominate numbers, using days and weeks, pints and quarts, inches and feet; parts of Tables of Federal Money, Time, Dry Measure and Long Measure; much drill in reading and writing dollars and cents, and using the simple processes therewith.

LANGUAGE.—1. Uses of some of the more difficult punctuation marks ; quotation marks. 2. Illustrate and define quality-words ; modifying words (*how*-words, *when*-words, *where*-words) ; connecting words ; substitute-words : form compound sentences from simple sentences. *Note* : Constant drill in distinguishing, recognizing, and constructing sentences in application of these points as they are presented one after the other. 3. First, *thought* ; afterwards, *expression*. Conversation between Teacher and pupils about some picture, object, or incident of the day, to lead children to think, to talk, and to discern by what means they make their discoveries ; afterwards, write upon the topic. Written work criticised.

DRAWING.—Drawing from objects of simple outline ; shading ; drawing from cards.

GEOGRAPHY.—First and Second Terms. General lessons in Form and Place have led to representation of plane surfaces (platform or table). Teach cardinal points. Draw maps of school-room ; of the grounds. Study map of the county, tracing streams, roads, giving directions, judging distances. Take journeys. Just ideas of river, island, right bank, farm, meadow, forest, hill, city, etc. Third Term—Journeys continued, with definitions (Guyot's Introduction).

---

#### GENERAL LESSONS.

Music ; Form ; Size ; Plan ; Human Body ; Animals ; Plants. (All continued through three years.)

---

#### MANNERS AND MORALS.

I. Pupils trained to be polite, kind and generous : to be careful of their own and others' property ; to regard the rights of others. Such is the intimate relation between the actions of the body and those of the mind, that it is the duty of the teacher to watch carefully the manners of his pupils, as an agency in teaching good morals.

II. Pupils trained to suitable positions of body, head, feet, and hands, whether standing, sitting, or walking. The control of the actions of the body is the first step toward the control of the actions of the mind. If all the movements of the school-room are prompt, orderly, and graceful, the pupil will form habits which will be of the highest value to him through life.

III. Songs ; maxims ; selections from prose and poetry memorized by the school such as will please children and at the same time will impart healthful moral lessons and cultivate a refined taste.

## ADDITIONAL INFORMATION.

---

Thorough DISCIPLINE will be enforced in every department of the University.

Experience has shown it to be necessary that a perfect understanding should exist between the President and those with whom the students board, in respect to the habits and conduct of students in their rooms.

---

BOARD, in good families, costs from \$3.00 to \$4 00 a week, exclusive of fuel, lights, and washing; when the fuel and lights are furnished, the charge is a little more.

The expense of board is reduced about one-half by boarding in clubs, and by self-boarding. Rooms can be secured, at reasonable rent, in the village.

---

The following may be considered a near approximation to the necessary EXPENSES for one year, exclusive of pocket money, apparel, traveling, and board in vacation:

Board, 36 weeks,	-	-	from	\$72 00	to	\$144 00
Washing,	-	-	"	15 00	"	25 00
Books and Stationery,	-	-	"	10 00	"	15 00
Total,				<hr style="width: 50%; margin: 0 auto;"/> \$97 00 to \$184 00		

---

TUITION is FREE in the Normal Department, to those who take the pledge to become teachers in Illinois.

No one is admitted to the Normal Department who does not declare an intention to become a teacher; but he may be freed from his obligation to teach in Illinois by paying tuition at the rate of thirty dollars a year.

Students are advised to bring with them such books as they may have, but not to purchase others until they arrive at the University.

---

The APPARATUS is excellent in quality, and sufficiently ample for the ordinary purposes of illustration.

---

The University LIBRARY is choice in character, and contains 1,500 volumes of valuable standard books. Additions are made to it from time to time.

The DIPLOMA of the University is conferred upon all who creditably complete its full course of study.

---

A CERTIFICATE is granted for the successful completion of one year's work, and another for that of two years.

---

There are two LITERARY SOCIETIES, the Philadelphian and Wrightonian, each of which has a well-selected library.

---

The MUSEUM and LIBRARY formerly belonging to the Illinois Natural History Society are in the University building, and to these the Students of the University have access, under suitable restrictions.

## OBITUARIES.

### MARY A. FULLER.

Miss Fuller was born in Tazewell County, Ill., in 1841. She entered the Normal School April 13, 1860, before the occupancy of the new building. She remained until her graduation in 1863. Immediately after graduation she commenced work in Decatur as Assistant in one of the Grammar Schools, and remained there for seven years.

Resigning, she accepted the principalship of the Magnolia Schools, which she retained three years. This proved to be the last of her work as a teacher. Her family had removed to Normal, and there Miss Fuller joined them to enjoy the quiet of her pleasant home and to devote herself to the further development of her cultured mind. After a visit to England and the Continent and a rest of three or four years, she spent a year in the Boston School of Oratory, and was seriously thinking of resuming her teaching work, of which she was ardently fond, when she was suddenly attacked with a fatal illness and in a few hours she had entered into the new life.

She was a woman of rare poise of character. Her habits were those of the scholar. She loved the seclusion of home and the companionship of books; but she was no recluse. She felt the currents of our busy modern life and shrank from no duty that came to her door. The thoughtful, earnest, sincere, clear-faced little woman impressed herself with singular force upon her associates, for she always brought with her suggestions of higher living and purer atmospheres of thought. To scores of young lives she gave such trend and inspiration that she still lives in many a home to enrich and bless it by the potency of her character.

She was buried at her old home in Tazewell county.

#### ANNA M. GLADDING.

Miss Gladding entered the Normal School in September, 1868, from McLean County. She had been for some time a student in the Model School, and by the singular sweetness of her disposition, and by her patient fidelity, she had won the esteem of all who knew her. She finished the course in 1872, and at once began her work as a teacher, spending the first year in Vienna, Ill. The two succeeding years she taught in district schools; '75-6 she did not teach, but resumed her work the succeeding year, teaching in Galva.

Never robust, her strength was insufficient for the wearing life of a teacher; she therefore relinquished her position and removed to Vineland, N. J. Nothing was known of her ill-health until the news was received in April that she had passed away.

#### EMMA V. (STEWART) BROWN.

She entered school in September, 1870. One year was spent in teaching during the course, so that she did not graduate until June, '74.

She taught in Rochelle '74-5; in Peru, Ind., '75-6, and '76-8 in Wichita, Kan.

August 9, 1868, she was married to I. Eddy Brown, of the same class, and removed to Decatur, where Mr. Brown was employed as principal of the High School.

Her wedded life was brief. August 1, 1880, a little less than two years from the time of her marriage,\* she died of puerperal fever. She left a babe, but it survived her only a few weeks.

The closing days of her life were singularly beautiful. Conscious of approaching death, she arranged all of her affairs with the serenity and fortitude of the hero of a hundred fields. Loving life as only the young blessed with all that is beautiful can love it, she submitted to the inevitable with calm composure, and even greeted it with a happy smile.

#### FRANCES PRESTON.

Miss Preston entered the Normal School from Lee county in September, 1874, and graduated in 1878, taking the full Latin and Greek course. The year '78-9 she taught in Centralia. In September, 1880, she commenced work in the Mendota Schools, west side, and remained there until the following Spring, when failing health compelled her to resign.

She returned to her home in Amboy, but she rapidly declined, and died May 3.

She had an intense desire to acquire knowledge, and doubtless hastened her death by over-study and severe exertion as a teacher. She possessed an unusual amount of individuality and originality, and by her careful preparation was espec-

ially fitted to occupy a conspicuous position. Her ample success as a teacher indicated that if her life had been spared she would not have disappointed the high hopes of her many friends.

#### FLORENCE RICHARDSON.

Miss Richardson entered school in September, 1875, and graduated with her class in '78. Immediately after graduation she became an Assistant in the Schools of Millersburg, Mercer county, where she remained one year. In September, '79, she entered the Bloomington corps, where she remained until her death. The following sketch is taken from the Bloomington *Pantagraph*, for which it was prepared by Rev. J. W. Dinsmore:

A very great company attended the funeral of the above-named young lady, at the Second Presbyterian Church, yesterday afternoon. It is creditable to human nature that so great public interest should be shown in a simple school teacher. Many a millionaire has been carried to his grave without a tithe of the respect and sympathy that were shown yesterday for the memory of this modest girl.

Her father was a Union soldier, and was killed in the war. Her widowed mother gave her up to the care of Mr. and Mrs. William Richardson, when she was about two years old. In this home she henceforth lived, and in their arms she died, in the twenty-third year of her age. To this excellent couple she was devotedly attached, and in all their trials and sorrows she continued as loyal and loving as if their own blood had flowed in her veins. She had a very bright and active mind, and from the first made rapid progress in her studies and in music and other accomplishments.

From our public schools she entered the Normal University, and, having made a very successful course, she graduated in 1878. Having become a teacher in our city schools, she rapidly advanced until she became mistress of the highest room in No. 1, and some months ago was promoted to be Principal of No. 3. To this creditable distinction she was borne, not by the strong hands of influential friends, but by the simple force of real merit and industry. She was thoroughly devoted to her calling; talented, diligent, painstaking and full of a sustained enthusiasm. She gave much promise of a brilliant career in her chosen work. She was a faithful member of the Second Presbyterian Church, being a pupil and lately a teacher in the Sunday school, much admired and respected by her pastor and by all who have knowledge of her ways of life. Her loving and sacrificing devotion to her foster parents was beautiful and noble. No less was she devoted to the mother that bore her, although necessarily living mostly at a long distance from her. She was called away suddenly just as promise was budding into fulfilment, as hope was waxing into realization.

A highly intelligent, attractive, amiable and whole-hearted young woman—a sincere disciple of Jesus Christ—well qualified to live, well qualified also to die. Peace to her ashes, while her memory will be long and lovingly cherished by many who knew her in life. This little tribute is gladly laid on her grave by one who knew her well and valued her highly.

The preceding pages show that the State Normal University offers excellent advantages to persons desiring to pursue any one of four distinct lines of study.

### I. THE NORMAL SCHOOL.

The work of the Normal School is the central thought of the University,—it is for this that the University exists,—all the other departments were established to assist in doing this work. Nevertheless, the other departments will serve well the purpose of those wishing instruction in their several fields, even though they have no design to become teachers.

The sole purpose of the Normal School is to prepare teachers for the schools of the State. It will be seen that its pupils are instructed and drilled both in the things to be taught and in the methods of teaching. The usual time necessary to complete a full course is three years; yet, if pupils can show by a thorough examination that they are fully prepared on any of the studies of the course, they will be excused from pursuing these studies. On the other hand, no student will be allowed to pass a study until he has accomplished a certain result, no matter how much time he may have given to it.

### II. TRAINING DEPARTMENT.

This department includes the *professional* work of the Normal School, and all who graduate from the Normal School must take this full course. But, by the recent action of the Board of Education, any persons who are found to be prepared may take the professional study and practice *alone*, and receive a certificate for work successfully done. This offers to the teachers of the State an opportunity for strictly professional improvement, of which it is hoped many will avail themselves. See also page 41.

### III. SCIENTIFIC DEPARTMENT.

Our facilities for the study of Botany, Zoology, Geology, Chemistry, and Mineralogy, are excellent; and we now offer them to such as desire to make these studies a *specialty*, at a very small cost.

### IV. MODEL SCHOOL.

This school, in its several departments, offers great advantages for obtaining academic instruction of any grade below that of our best colleges; and it will be observed that the cost of tuition is very reasonable. Pupils completing the work of the High School are allowed to graduate, and receive the formal diploma of the Institution. See page 45.
